

# International Congress on Biological, Physical And Chemical Studies

*International Congress on Biological, Physical And Chemical Studies - is an international conference platform under open access policy. The conference is led by international expert members who take an objective approach to peer review, ensuring each research paper is reviewed, edited by authors and evaluated on its own scholarly merits and research integration. Publishing and joining on the proceeding of the International Congress on Biological, Physical And Chemical Studies will ensure publishing experience and indexing possibilities on various global indexing.*

## Human Immunodeficiency Virus Indication Modern Methods Comparative Description

**Sultanov Fakhriddin**

Bukhara state medical institute

**Relevance .** Human immunodeficiency virus (HIV) world along the most big social and economic from problems one HIV - infected people number year gradually increasingly is going on , this and international health storage to the system big pressure (UNAIDS, 2022). Since the 1980s , HIV and his/her complications AIDS (Human Immunodeficiency Virus) shortage syndrome ) world on a scale many of people his life danger under put it . The virus early to be determined and control under to be taken of the disease spread prevent to take and of patients life quality in improvement important role plays (Smith and Johnson, 2020).

**Work purpose:** This of the work purpose HIV indication for being used modern methods comparative analysis to do through the most effective methods from determining consists of.

**Research Methods:** In research one row scientific and methodological from approaches used. Literature analysis HIV diagnosis through according to advanced research and their results Also , the laboratory analysis the results comparison from the method using various diagnostics methods accuracy and sensitivity indicators compared . Statistical methods using information again work through various diagnostics methods efficiency and practical importance An attempt has been made to assess this . except , experts with conversations and interviews conducted , methods clinical in practice in use to the surface coming problems are also analyzed made .

**Work news :** This in research modern HIV diagnostics methods compared without seeing issued is , their accuracy and efficiency according to analytical approaches presented The research novelty from that consists in that there is diagnostics methods between comparative analysis current modern requirements and technological opportunities point of view from the point of view take Research results diagnostics methods which one current under the circumstances the most many to the advantage has that to determine help gives and this through patients own on time and clear diagnostics to do opportunities increases . From this in addition , in research of technologies public to your health impact and from them use opportunities also new about scientific information presented done .
