INTRODUCTION

The human-nature relationship reflects the individual factor and the current period in the account to increase the efficiency of labor in the production of, is the basis for improvement of professional skill. Professiogramma which reveal the essence of the professional, professiografiya, on the basis of higher agricultural education institutions for the training of agricultural specialists psixogramma the aspiration of should be. After all, high technology to manage your capable, creative, independent-minded, professionals have grown to uquvli shaxslararo to set up a relationship, noble intentions in social life would be established.

Methodology the basis of professional psychology - is the concept of the professional formation of this person. The main essence of this concept, the professional and the person advancing in the selection process in terms of the amount that will go to enrich the quality of their direction when he went through the same experience and potential in the form of. In the process of professional formation of the crisis, conflicts, changes can be destruktiv. The speed of this process of biological and social factors, as well as those random instances, vital professional events are related.

Professional formation - this person is a large part of the development include the goal of any it professional find the content start, tugallangungacha includes the period of professional life. This geteroxron optasiya from the process, that is, professional education and training, profadaptatsiya, professionalism and skill stages can distinguish.

Type of professional formation

Factors of the way and the speed is determined by a group of professional formation. The age of them, individual-psychological, professional, technological and socio-economic factors can add.

Professional development - professional and important direction have enriched the quality of this potential, boosts the effectiveness of work activities to go with is determined.

In terms of the person's occupational and professional development have the power to resolve various issues on their own work and find a way to get himself to spend and to create opportunities shartsharoit, assisting in the development of professional and personal development destruktiv traditions assistance and psychological help to people.

To realize himself from the professional aspect

Human capabilities with the requirements of the profession of independent activity to understand the psychological aspects and content of the professional, as well as certain socio-economic situation find the meaning of works in

Labor psychology-cognitive psychology of human activity and the improvement of the field of psixik qonuniyat if it is in the process of the person in the labor process, learn about the features and circumstances. Psychology psychologist psychological

problems mission work functions of labor, labor productivity increases both psychological conditions of work and rest regime, the psychological analysis of the type of work, depending on the psychological characteristics of their personnel to select and place individual-put into place, the production includes issues such as the psychological causes of accidents and trauma.

One of the important functions psychologist labor, labor conditions, from tools and content analysis. Various defects in production, the disabled and the great attention is given to determine the diagnostic optimallashuv through the experience fatigue. However, researchers mainly focus on the operational aspects of the work we have, the performer, is the description of its psixofiziologik. The main problem is that this psychologist labor of human labor to the arms, procedures, processes and conditions that is accustomed to. The work of this man have been studied on the basis of the method of adaptation to psychological and physiological. **The classification of occupations:** engineering psychology and human - cognitive psychology is the branch of technical information between the structures and processes of communication tools. Engineering psychology psychology election of technical equipment with those who are managing it and dealing with the effects of mutual interaction between the binding in the special field of the check. The scientific basis and engineering psychologist optimal function in respects of structures possessing psixofiziologik labor productivity in the design of giving immediate help to orttiruvchi psixik engineering specialist.

The psychology of the young period - until the end of his life to the person in ontogenez person born that night in cognitive psychology stages of development and formation psixik network. Psychology psychologist election of the various young age - childhood, adolescence, and in the special field of study is known as the youthful stage of development qonuniyat psixik other. Pedagogical psychology - cognitive psychology to the field of education to the individual problems and giving qonuniyat. Psychologist education and training in pedagogical psychology as the study of psychological problems mission to the young generation in the special field of the known. Scientific basis of psychology is one of pedagogic pedagogical, pedagogy, and facts on the theory and practice of psychologist will identify qonuniyat needed to make up for.

Work should emphasize the difference of the subject of psychology and professional psychology. Klimov e. a., psychology, representing labor, gives the following description: work functioning and formation of psychology as science and as the subjects of this man solving tasks in the field of methods, ways and conditions constitute the dimension of cognitive psychology. The person learns from the formation of the professional aspects of professional psychology. Thus, it is considered as the formation of the professional development of the person. Professional psychology-labour occupations or work in a particular profession psychologist psychological components than the norm requirements from dealing with the psychological study and scientific analysis is to be put.

Of specialists in different socio - cultural and socio-economic importance of professional behavior look. Motivational and cognitive psixomotor given without attention to the quality of the person is the main focus of professional accomplishments. Between a man and his profession, as well as professional occupations will analyze the relationship between the structure and function of the universe. Learn the importance of human psychology for professional activity, professional, and a professional will study the formation of the individual, as well as from the imagination of my youth, professional development, professional maturity in the profession, especially to the effects of determenantalarini to enter his life and learns. The important aspects of professional psychology - this is the analysis of professional activity, professional goals, situations, the recipients of difficulty in the study, is to identify the professional requirements.

Based on the definition of the subject of professional psychology, according to the purpose of his duties following the allocation of the show:

1. Of the person, to professional formation , the basic concept and principles of research, the base of the style of their activity;

2. Professional psychology research development and drafting of the subject of which is suited to specific methods uslullarini;

3. Descriptive analysis of the psychological structure that have been profession, occupations proektlash development of methods and principles;

4. The professional formation of the person and qonuniyat for the study of psychological mechanisms. Identify factors determinantlovchi the dynamics of this process, a professional form the analysis of the crisis;

5. Specialists of professional desturuksiyalarini, the displacement of that person to the decline of the professional activities of the disabled and others;

6. The person conducting the professional development of monitoring, and tools development psixodiagnostik certification of specialists in this regard;

7. The formation of professional psychological help to the person's professional life and a person throughout their help, support;

8. Professional advice, develops the psychological aspects of personal information that professional certification, professional development psixotexnikasi, professional correction and rehabilitation, I am armed with professional knowledge in the area of psychological preparation to going to.

Professional formation of the person include a large part of this development, the goal of any it professional find the content start, tugallangungacha includes the period of professional life. This geteroxron optatsiya from the process, that is, professional

education and training, profadaptatsiya, professionalism and skill stages can distinguish. Konseptual main rules of professional psychology is reflected in the following table.

Professional selection stage of professional formation and the speed is determined by a group of factors of the way. The age of them, individual-psychological, professional, technological and socio-economic factors can add.

Election of the important aspects of professional psychology – this is the analysis of professional activity, professional goals, situations, the recipients of difficulty in the study, is to identify the professional requirements.

Professional psychology based on the definition of the subject, according to the purpose of his duties following the allocation of the show:

1. The basic understanding of the principles of professional formation of the person of their activity and research base of the style;
2. Professional psychology research development and drafting of the subject of which is suited to specific methods uslullarini;
3. Descriptive analysis of the psychological structure that have been profession, occupations proyektlash development of methods and principles;
4. The professional formation of the person and qonuniyat for the study of psychological mechanisms. Identify factors determinantlovchi the dynamics of this process, a professional form the analysis of the crisis;
5. Desturuksiyalarini professional expert, that person's decline and the relocation of the disabled to the professional activities of others;
6. The person conducting the professional development of monitoring, and tools development psixodiagnostik certification of specialists in this regard;
7. The formation of professional psychological help to the person's professional life and a person throughout their help, support;
8. Professional advice, develops the psychological aspects of personal information that professional certification, professional development psixotexnikasi, professional correction and rehabilitation, I am armed with professional knowledge in the area of psychological preparation to going to.

Professional formation – this person is a large part of the development include the goal of any it professional find the content start, tugallangungacha includes the period of professional life. This geteroxron optatsiya from the process, that is, professional education and training, profadaptatsiya, professionalism and skill stages can distinguish.

The primary mission of a professional psychologist konseptual qoidalar is reflected in the following table.

Basic concepts	Konseptual the rules
of professional formation	of professional formation – this person is a professional in the selection process to prepare professional education, as well as professional business development process .
The stage of professional formation of	the professional formation process getroxron some time to jump in and drop feature. The interplay of the personal and professional development of an individual who is included in the factors of conflict and crisis, according to. This individual process of full-fledged and can be divided into the main activity associated with the stage of the social situation. They sirasiga professional preparation, professional, punctuation marks, and professional skills include primary and secondary professionalizatsiya.
Types of professional formation	and the way a group of professional formation is determined by the speed of factors. The age of them, individual-psychological, professional, technological and socio-economic factors can add.
Professional development	Professional development professional potential direction and have enriched the quality of this important work also boosts the effectiveness of activities to go with is determined.
The psychological aspect of professional development .	In terms of the person's occupational and professional development to resolve various issues on their own work and find a way to get himself to spend to have the power to create conditions and opportunities, assisting in the development of professional and personal development destruktiv traditions assistance and psychological help to people.
To realize the professional aspect of himself from	a man of the profession of independent activity to understand the psychological aspects of the content and capabilities of the professional requirements, as well as certain socio-economic situation in do-expect to find the meaning of work.
Get to protect himself from the professional aspect.	Productivity professional activity directed to the human person in a permanent self-changing stand out ruyobga the possibility of professional self

	training and professional life take control of situations related to professional development and raised in overcoming post destruktiv .
Professionalizatsiyalashuv destruksiyalari	Professionalizatsiya changes in the amount and quality in the process, and displacement is observed with the development of the individual.
Professional self-activation	by way of boosting the power of the individual professional development accelerate the strengthening of the norm more than the display of professional activity, as well as different participate psixotexnologiyalarda and others.
Professional ijtimoiylashuv	you take your profession to go into Professional ijtimoiylashuv observed; that is, the opportunity to find its place ta'rifikatsiyada professional professional development, professional identity formation .

Social development in the country, prepare highly qualified specialists for the implementation of them should escalate to the level of world standards, the development of science and technique today to respond to a broad level, knowledgeable, selfless explain the identities of the men of their profession by the state to find which create competitive products in the market that gives the owner the economy to withstand it should be noted that the formation of the occupation movement. Steadfastly they meet the requirements of that period, the interest is large, solid professionalism, stable memory, thinking, searching, aspiring, hard-working, patriotic, I believe-belief, let a person be an adult.

It is noteworthy that all of the recipients of secondary education professional when it comes to choose that will keep not reasonable and proper way, of course. Some of them go to keep his job, and afford some parents are away they choose to emulate a clear pattern to the profession or standing and, sometimes, they are designed to go in the footsteps of the man constantly a favorite. Many students master the basics of science in the education process, they will form a certain picture, the professional who think like themselves.

Governors of the latest school's okay, appetites, aspirations, desires, motives, noble-kasbkorga the intention of particular interest, motives, needs, intertwined with the problem of the birth of psychology of the person. Personality psychology is the study of professional readers choose to send it to. Individual readers tipologik features, taking into account age and sex, every one of them transfers the reasonable person is one of the important functions professional psychologist. Building a market economy based society of independent professional readers to choose in the document (through their own chances) to teach a task is very important and necessary, he noted. Accordingly, psychologists, scientists, methodologist, and diagnosis on the staff of the center shared with the general public propaganda they make extensive professional knowledge, professional-cor to develop and guidance on methods they choose, to choose a profession the advice of the official extension offices, professiogramma, professiografiya, psixogrammalar scale should be increased.

For the rational organization of activities to choose a profession which need experts to keep in mind that the area of the country again the recipient of their education and buck are ok, ambition, interest, opportunity, depending on mental and physical ability, fitness and determine it or not this professional, profession you need to send after
